Privacy Law

Consenso al trattamento dei dati personali

Do you authorize the FMD to the treatment of your personal data?:

I do authorize the FMD to the use of my personal data.

Project Type

Education up to 29 years

Project Description

Description Frase (max. 500 characters):

Telemedicine in the developing world mirrors prevention activities to a large extent. The primary benefit of telemedicine lies in facilitating remote access to prevention and care (i.e. by increasing speed of access and/or reducing cost of access).

Project Summary (max. 2000 characters):

ePrevention Contents & quality service: Support to generate the bases for the establishment of strategic alliances between the public institutions and participant organizations of the civil society with a view to the implementation of joint initiatives or to the collaboration in concrete actions in strategies for the prevention in the Andean Region doing use of the ICT. The adoption of measures would be due to encourage to facilitate the access to the Internet and to increase in general the knowledge of the ICT. Sufficient diversity to serve individuals and communities.

How long has your project been running?

2012-05-30 22:00:00

Objectives and Innovative Aspects

Objective: e-PREVENTION's goal is to accelerate technology development, deployment, and implementation for sustainability and widespread public health impact.

The agreement covers the three following axes:

- (a)Telemedicine: support to various forms of investigations on knowledge and skills of participating nurses / personal in the hospital, health center
- (b) Library: support to investigations for access to informational resources; public cabins

Results

Describe the results achieved by your project How do you measure (parameters) these. (max. 2000 characters):

To support the visibility and dissemination of the development of an ePrevention Platform to guide by bridging the path towards Innovation for Women. The digital economy are supposed to have the greatest priority from the government, investors, thinkers and scientists within the next period as it is the most important parameter that will make a real change in our society. Cloud computing has grown into a vital toolkit more efficient, faster and more responsive.

How many users interact with your project monthly and what are the preferred forms of interaction? (max. 500 characters):

e-Prevention, we've focused on the interaction trough social media (Facebook, Flickr, YouTube, Vimeo and Instagram) and, our face-to-face/virtual workshops. Our Facebook page has been the most popular form of interaction, mainly because everyone can see any type of content (video, photos or information) in different countries (Andean Region) without cost for the users.

Sustainability

What is the full duration of your project (from beginning to end)?:

From 3 to 6 years

What is the approximate total budget for your project (in Euro)?:

Less than 10.000 Euro

What is the source of funding for your project?:

Grants

Is your project economically self sufficient now?:

No

Since when?:

2015-04-29 22:00:00

When is it expected to become self-sufficient?:

2016-11-29 23:00:00

Transferability

Has your project been replicated/adapted elsewhere?:

No

What lessons can others learn from your project? (max. 1500 characters):

(a) Telemedicine: support to various forms of investigations on knowledge and skills of participating nurses / personal in the hospital, health center

(b) Library: support to investigations for access to informational resources; public cabins

Are you available to help others to start or work on similar projects?:

Yes

Background Information

Future plans and wish list (max. 750 characters):

e-Prevention Contents & quality service: Support to generate the bases for the establishment of strategic alliances between the public institutions and participant organizations of the civil society with a view to the implementation of joint initiatives or to the collaboration in concrete actions in strategies for the prevention in the Andean Region doing use of the ICT. The adoption of measures would be due to encourage to facilitate the access to the Internet and to increase in general the knowledge of the ICT. Sufficient diversity to serve individuals and communities. Expand the project and help other countries in Andean Region. Future wish: Training leaders to replicate it.
