Consenso al trattamento dei dati personali

Do you authorize the FMD to the treatment of your personal data?:

I do authorize the FMD to the use of my personal data.

Project Type

Education up to 10 years

Project Description

Description Frase (max. 500 characters):

Video and teaching guides portal of interactive K12 education based on storytelling using ICT.

Project Summary (max. 2000 characters):

This project presents best educational practices from the real classroom to the general community using video portal. In this way other teachers can learn novel techniques, parents can use this educational materials to learn together with their children, and pupils can prove that learning can be so much fun.

The best educational practices show how interactive techniques and storytelling in combination with free materials and ICT can create engaging learning environment applicable in different classrooms.

Showing How to combine technology with other teaching tools in work with little students.

The idea was born by me, Vesela Bogdanovic. I wanted to show that good educational practices and ICT are applicable to children in rural area at the same level (if not even better) as to the children that live in the urban area.

- I am the main contributor of the project today, but my work is supported by
Ministry of Education
Prime minister
President of R.Macedonia,
U.S. Embassy in Skopje
Department for development of Education in Macedonia,
Microsoft partners in learning-Macedonia
Friends of education
Association for educational and cultural initiatives Step By Step Macedonia
ISSA - International Step by Step Association
USAID Macedonia
Center for European Development and Integration
Kreativa-Serbia
Association of Citizen - Sumnal <http://www.sumnal.mk/en/> ^[1]

By presenting this project teacher Vese Vesela was elected as one of the 50 best teachers in the world - Global Teacher Prize by Varkey Foundation

How long has your project been running?

2011-11-29 23:00:00

Objectives and Innovative Aspects

This project offer solutions, techniques, and methods that describe how to use creative ideas and deploy them using interdisciplinary activities, free materials and ICT in order to establish cross discipline education of small children. Using video portals, we show true examples of our educational practice, explain how to accomplish quality and successful interaction between the teacher and the pupils and the pupils with one another.

Our examples represent proven, healthy, successful ways of combining technology with all other educational methods, teaching tools and techniques- We proved that children using ICT can bring wonderful effects in terms of achieving goals in all school subjects.

We proved that even small children can collaborate, explore, create and direct the educational process. They can create even though they can't read and write.

We are here not only to encourage teachers to collaborate, exchange materials and ideas, accept and adjust to the contemporary trends, but also to give parents a chance have an insight in the work of their children through video recordings of their activities.

Thanks to the Internet even younger children (3-5) that live in rural areas where's no kindergartens can learn with their parents from home. Children in hospitals can see our educational materials and learn.

Results

Describe the results achieved by your project How do you measure (parameters) these. (max. 2000 characters):

- The project has been presented over 20 times on Macedonian National Television and NEWS, and over 50 times on newspapers in country and other countries.. still going on - The project has been supported by the ministry of Education, Prime Minister and President of R.Macedonia?? - The project leader has been selected as one of the top 50 candidate for Global teacher prize - First State Prize of PEP and UDAID Film Festival in Skopje movie - HOW CHILDREN MAKE A BIRD'S NEST - First Prize in the National Competition for the film - Macedoine pays de mes reves- Macedonia and second prize in the same competition for the website . -First - place at international education film festival in Serbia, Mionica - - Presenting on the International event Kreative School- in Banja Vrujci ? Serbia since 2011 to today - Presentation on the International Conference of Educators in Sarajevo in 2013 and 2014 at the invitation of the Foundation for cultural and educational initiatives Steb By Step - Macedonian Microsoft Ekspert 2014 ? Presenting Macedonia at Global Forum Braselona - Teacher mentor and trainer for other tecahers in our country supported by USAID and Ministry of edycation

How many users interact with your project monthly and what are the preferred forms of interaction? (max. 500 characters):

Every day i cooperate with many teachers, parents and students. I cooperate through social networks with near 9000 teachers from my country, Serbia, Bosnia, Croatia, Germany....

How I use social media:

Facebook, my web pages and blogs to share activities with the world

-WindowsLive Mail, Gmail exchange of materials and collaboration with colleagues

-Skype the implementation of online classes with other students and colleagues in remote locations.

-Google + Hengout for online classes available to the widest audience

(There are many preschool children who are living in villages where there are no kindergartens and I think if they follow our activities on the Internet they could learn together with)

We present how to combine technology and other teaching techniques and methods in classroom so that school is more pleasant and more magical.This is an encyclopedia of fun

and educational content.

Sustainability

What is the full duration of your project (from beginning to end)?:

More than 6 years

What is the approximate total budget for your project (in Euro)?:

Less than 10.000 Euro

What is the source of funding for your project?:

Other

Specify:

Individual citizen

Is your project economically self sufficient now?:

Yes

Since when?:

2011-11-29 23:00:00

Transferability

Has your project been replicated/adapted elsewhere?:

Yes

Where? By whom?:

Microsoft Global Forum Barcelona 2013- By Me, Global Teachr Prize 2014 -By me

What lessons can others learn from your project? (max. 1500 characters):

This project offer solutions, techniques, and methods that describe how to use creative ideas and deploy them using interdisciplinary activities, free materials and ICT in order to establish cross discipline education of small children.

Using video portals, we show true examples of our educational practice, explain how to accomplish quality and successful interaction between the teacher and the pupils and the pupils with one another.

Our examples represent proven, healthy, successful ways of combining technology with all other educational methods, teaching tools and techniques- We proved that children using ICT can bring wonderful effects in terms of achieving goals in all school subjects.

Are you available to help others to start or work on similar projects?:

Yes

Background Information

Barriers and Solutions (max. 1000 characters):

The project so far is done or strictly voluntary basis. Although the project is supported by all relevant national educational policy makers, and general community, and the project do not need significant funding, its continuation is really directly related with the enthusiasm of its main contributor. In order for project to grow, and wider its impact it has to be financial self-sustainable. For that purpose initial funding for developing facilities which will bring possibility for commercialization of some services offered by the project is needed. Another possibility is to further develop this project in a for of TV broadcast that can have income from commercials

Future plans and wish list (max. 750 characters):

The project can grow in two directions: The first one is building of the rural facility that can

accommodate pupils from different schools (for certain fee) which will enable them to learn and interact with each other during the schools excursions. The second one is to produce the education TV program and share part of he commercial income.
